

## AN/TSQ-154 NODE Management Facility

Status: To be determined; NSN: To be determined

Reference: TM 11-5895-1375-13

### General Information

The management facility assemblage provides the equipment and space required by the node commander to manage the communications resources of the node, both NC and LEN. The management facility assemblage is housed in an S-250E Shelter and transported on an M-1037 (HMMWV). For nodal intercommunication, the intercoms and VINSON headsets are provided. Network access is provided by the DNVT, TA-1035(U). Provisions are available for the node commander to remote the DSVT, KY-68, of his AN/VRC-97 into the management shelter. Power is provided by a PU-753/M, 10-kw, trailer-mounted, diesel generator set.

### Major Components

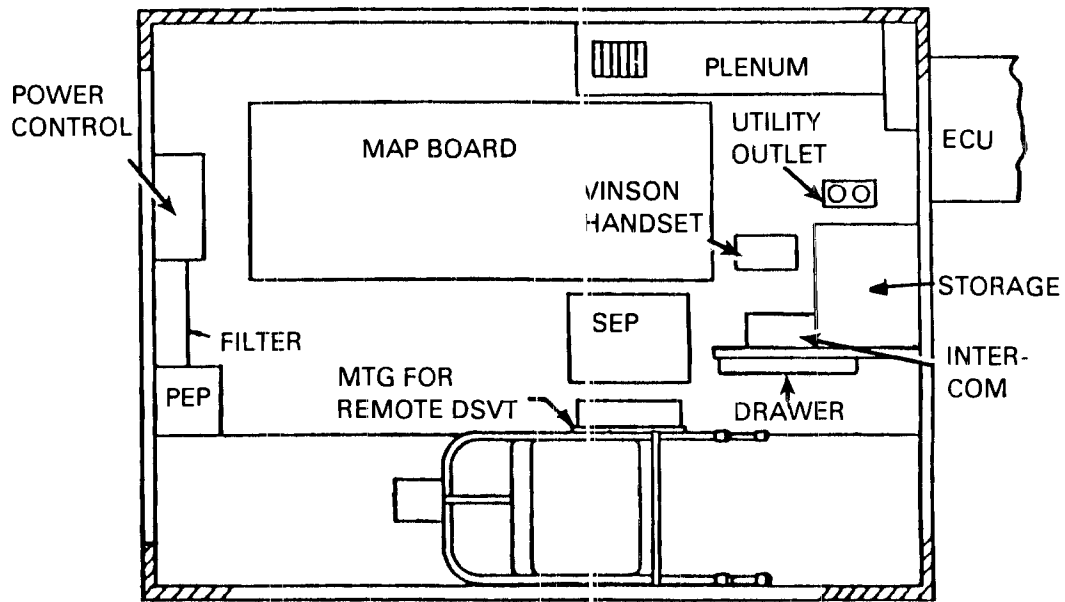

1 Shelter S-250( )/G	1 Headset VINSON COMSEC
1 Communications Terminal AN/UGC-74	1 DNVT TA-1035/U
1 Intercommunications Station LS-147	1 Environmental Control Unit
	1 Desk
	2 Map Boards

### Technical Characteristics

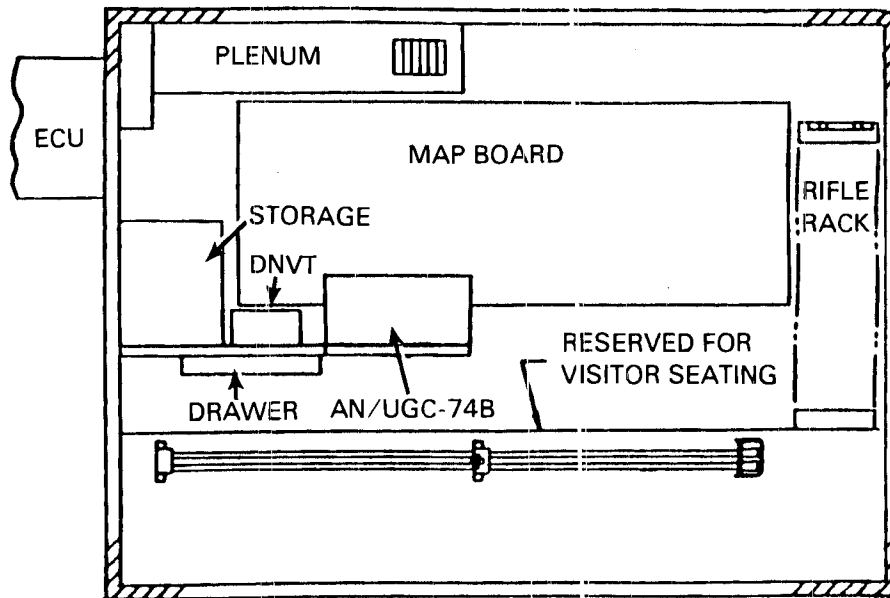

Power Requirements-----115 V AC, 50 or 60 Hz, single phase

NOTE: The management facility is used at LEN and NC.
